

# Movement with Buttons

*Move a sprite by touching a button.*

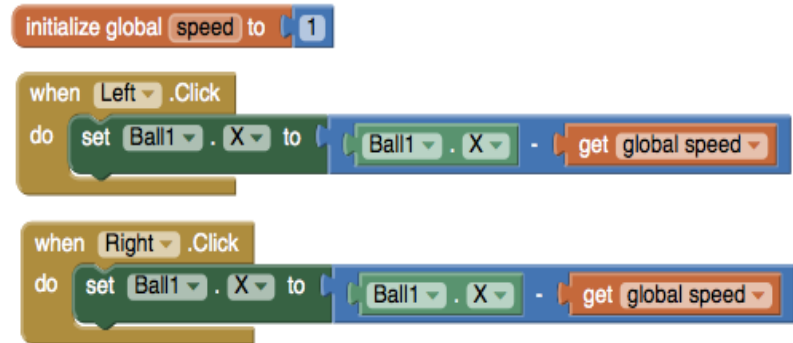

## Get Ready

You will need these components in the design screen:

- **Canvas**
- **Sprite**
- **Button**

## Try These Blocks

## What Does it Mean?

Define a **speed** variable to 1 to set the how far the sprite will move each time the button is clicked.

The **Left.Click** event moves the ball to the left every time the button is touched.

The **Right.Click** event moves the ball to the right every time the button is touched.

**Can you add buttons to make the ball move up and down?**
